

MSc Accountancy & Financial Management (Top Up)

Aligned to the Final Year ACCA programme, our MSc in Accountancy and Financial Management is designed to support your career development in business, accounting and financial management roles. It offers the finance, accountancy and broader management knowledge that can be central to success in many private and public sector industries.

Our dedicated, highly qualified and experienced team will lead you in an exploration of the principles and practice of financial management and accounting, the context in which they operate, and how they are managed. We'll help you acquire the applied skills involved in financial reporting and financial management, as well as wider management issues such as corporate and social responsibility, business ethics, risk and business strategy, financial performance, and taxation/auditing.

You'll be encouraged to explore research methods, giving you the chance to gain an understanding of a range of research tools and analytical techniques. This knowledge will be of value when you undertake your Master's dissertation when carrying out a substantial piece of research on an accountancy or financial management issue will enhance your critical and investigative skills, and could benefit your professional practice.

Course Highlights:

This course aims to build upon your professional qualifications for a career in financial management or accountancy.

- * The study and research skills you will be introduced to are in demand far beyond the financial services industry.
- * You'll be encouraged to develop key abilities in a critical thinking and awareness of the principles and techniques needed for effective financial decision making.
